# TABLE OF CONTENTS

**Fatigue Failures of Compressor Impellers and Resonance Excitation Testing** ........................................... 1
Fred L. VanLaningham, Senior Staff Engineer, Machinery Management, Union Carbide Corporation, Houston, Texas; Dave E. Wood, Staff Engineer, Union Carbide Corporation, South Charleston, West Virginia

**Maintenance Techniques for Turbomachinery** ................................................................. 11
William E. Nelson, Manager, Maintenance Services, Amoco Texas Refining Company, Texas City, Texas

A Review of Design Analysis Methods for a Horizontal End Suction Centrifugal Pump ................................................................. 21
Robert C. Cherry, Project Staff Engineer, Brown & Root, Inc., Houston, Texas

Effects of Fluid-Filled Clearance Spaces on Centrifugal Pump and Submerged Motor Vibrations ......................................................... 29
Henry F. Black, Professor of Mechanical Engineering, Heriot-Watt University, Edinburgh, U.K.

**Design and Full Load Testing of a High Pressure Centrifugal Natural Gas Injection Compressor** ........................................ 35
Vijay K. Sood, Senior Product Engineer, MB Compressors, Elliott Company, Jeannette, Pennsylvania

Selection and Design of Tilting Pad and Fixed Lobe Journal Bearings for Optimum Turbomachinery Dynamics .................................................. 43
John C. Nicholas, Analytical Engineer; R. Gordon Kirk, Supervisor; Rotor Dynamics Analysis, Ingersoll-Rand Company, Phillipsburg, New Jersey

A New Vibration Criteria for High Speed Large Capacity Turbomachinery ................................. 59
Kazuhiro Shiraki, Manager; Hiroshi Kanki, Research Engineer; Vibration Research Laboratory, Takasago Technical Institute, Mitsubishi Heavy Industries, Ltd., Takasago, Japan

**Centrifugal Compressor Labyrinth Seal Systems** ................................................................. 71
J. Gerhardt Torborg, Engineering Associate, Exxon Research and Engineering Company, Florham Park, New Jersey

**Couplings — A User's Point of View** ................................................................................. 77
Charles Zirkelback, Senior Staff Engineer, Union Carbide Corporation, Port Lavaca, Texas

**Air Filtration and Sound Control Systems for Gas Turbines — The State of the Art** .......... 83
F. P. Lages, III, Manager, Sales—Gas Turbine Products, Sound Control Systems Group, Environmental Elements Corporation, Baltimore, Maryland

A Review of the Industrial Development and Usage of Electronic Governors .................. 95
Peter E. Jenkins, Mechanical Engineering Department, Texas A&M University, College Station, Texas

**Mechanical Drive Turbine Control Systems for the 1980's** .................................................... 109
Anthony J. Rossi, Manager, Turbine Systems Development Engineering, Mechanical Drive Turbine Department, General Electric Company, Fitchburg, Massachusetts

**Design, Performance and Operational Characteristics of a 6500 Horsepower High Performance Industrial Gas Turbine** ......................... 121
James R. Strother, Manager, Process Oil and Gas Applications, Detroit Diesel Allison Division, General Motors Corporation, Indianapolis, Indiana

**Special Papers**

API Organization and Mechanical Equipment Specifications ........................................... 133
John G. Housman, Chief Engineer, Mechanical Equipment, Refining and Transportation Engineering Department, Amoco Oil Company, Chicago, Illinois

Principles of Turbomachinery Bearings ................................................................. 135

**Discussion Leaders** ......................................................................................... 147
API PANEL MEMBERS ................................................................. 153
SPECIAL EVENTS SPEAKERS ...................................................... 155
ADVISORY COMMITTEE ............................................................. 157
EXHIBITORS .............................................................................. 161
GAS TURBINE LABORATORIES .................................................. 167
