# Table of Contents

**Hydraulically Fitted Hubs: Theory and Practice** ............................................. 1  
Michael M. Calistrat, Manager, Mechanical Section, Research & Development Department,  
Koppers Company, Incorporated, Baltimore, Maryland

**Failure Analysis and Repair Techniques for Turbomachinery Gears** ..................... 11  
Thomas C. Glew, General Manager & Chief Design Engineer, Prager, Incorporated,  
New Orleans, Louisiana

**High Speed Balancing Procedures** .................................................................... 25  
Dr. Robert Ehrich, Manager, Development Turbomachinery, Borsig GmbH, Berlin, West Germany

**Unique Fan Vibration Problems: Their Causes and Solutions** ............................. 33  
Donald R. Smith, Senior Research Scientist; Harold R. Simmons, Senior Research Engineer,  
Applied Physics Division, Southwest Research Institute, San Antonio, Texas

**Lateral Vibration Reduction in High Pressure Centrifugal Compressors** ............. 45  
Dr. R. Jenny, Manager, Research & Development, Turbocompressor Engineering;  
Dr. H. Wyssmann, Head of Mechanical Development, Sulzer Brothers Limited, Zurich, Switzerland

**The Analysis of Surge** .................................................................................. 57  
Ros Sentz, Senior Engineer, Union Carbide Corporation, Linde Division, Tonwanda, New York

**Sulfidation and Its Inhibition in Turbomachinery** ........................................... 63  
Dr. M. A. DeCrescente, Manager, Manufacturing Technology & Process Research,  
United Technologies Research Center, East Hartford, Connecticut

**Using a "Soundtube" to Measure Noise of Structural Sources in High Background Noise Environments** ................................................................. 69  
James T. Rainey, Senior Engineer, Research Division, Carrier Corporation, Syracuse, New York;  
Frank Kushner, Senior Engineer, Vibration/Acoustics, Elliott Company, Division of Carrier Corporation, Jeannette, Pennsylvania

**Vibration Problems of Large Vertical Pumps and Motors** .................................. 75  
J. E. Corley, Engineering Consultant, Arabian American Oil Company, Dhahran, Saudi Arabia

**Pump Energy Conservation Techniques** ......................................................... 83  
J. C. Cone, Senior Specialist Engineer, E. I. du Pont de Nemours and Company,  
Wilmington, Delaware

**SPECIAL PAPERS**  
**Geothermal Power and Problems** .................................................................. 105  
T. E. McIlraith, Pacific Gas and Electric Company, San Francisco, California

**Tutorium Leaders and Papers** ......................................................................... 119

**Discussion Leaders** .......................................................................................... 191

**Gas Turbine Federal Regulations Panel Members** ............................................ 195

**Special Events Speakers** .................................................................................. 197

**Advisory Committee** .......................................................................................... 199

**Exhibitors** ......................................................................................................... 203

**Gas Turbine Laboratories** .................................................................................. 209
